This Is Africa AndyCrosser #29

"This is British Broadcasting Corporation's Dexter Kent, reporting live from northwest Africa for the the festival-brimming beginning of the 1975 inaugural 'Great African Continental Sail Yacht Race'!

Two Teams -- with native crews representing countries from across Africa, roughly divided between the South and North -- will compete in 37 Legs, with the fastest combined-time circumnavigating the Continent crowned the victor. Sail crafts must pass through nearly 80 gates positioned close to major cities located around the Continent, enticing the world, the press to partake in this contest of sail daring.

The North sails the 1974 *Courageous*, the winner of the 1974 'American Cup'. This yacht is captained by Aziz Becca with a crew of 10. Later, I'll be interviewing the Captains and both Teams throughout the race.

The South sails the 1970 *Sorcery*, the winner of the 1974 'L.A. to Tahiti Race'. And this captained by Pierre Makuzo, also a crew of 10. Though both Teams' members -- two, women -- were drawn throughout Africa, from different countries, know that each and every Team member is a seasoned, qualified sailor.

Both gleaming 70-footers feature 85-foot single masts with headsail and mainsail, optional strut-rigged squared topsails for headwinds. Understand the global 12-meter Sail-Division encourages creative design, so other than the aforementioned dimensions, these two world-class yachts are indeed different yachts.

To keep the race competitive, a 3-hour maximum deficit will be added to second-place finisher in any one Leg. At least three full days of rest, repairs, and adjustments between Legs, though many of the Legs themselves are multiple back-to-backs. The victor wins a three million dollar purse, with the second-place finisher -- must finish -- awarded a two million dollar purse. Well Folks, that's most of the main particulars.

So check back later for the latest on the 'Great African Sail Race'. This is Dexter Kent, signing off for now."
